

Saf-T-Fil Bin Level Indicator

Effective January 1, 2018

Never Climb Again! Why settle for other brands that only let you know when the bin is 1/4 to 3/4 full. You still have to climb the bin to see if it is full.

Ours mounts on the roof and lets you know instantly when the bin is full.

This patented device allows you to remain safely on the ground while letting you know when your bin is full. The Saf-T-Fil saves you time and money by preventing overfill of your bin. The Saf-T-Fil Level Indicator can be installed in any size of bin during erection or retrofitted after the bin is built. Built with Tough Polystyrene and comes with a Reflective Indicator Rod.

Part# CY-SF-Green

Price - \$56.00

Freight: F.O.B Fargo, ND
